
Gira X1 Release Notes

Firmware-Version: 2.8.874
Date: 05.09.2024

Gira Project Assistant (GPA) version: 5.1 or higher
We recommend that you always use the latest available GPA version.

Resolved issues

- Error 1: This update fixes the problem that the KNX-TP communication of the Gira X1 fails in rare cases and can no longer be established.
- Error 2: This update fixes the problem that the controller for KNX bus communication is not reset when the Gira X1 is restarted via the device website. This prevents operation from being resumed by restarting the device after error 1 has occurred.
